

Amazon EU Middle Mile Shift Intelligence Dashboard

Product Summary

This dashboard provides a single source of truth for associate productivity and shift compliance across Amazon EU Logistics operations. It enables operations managers and site leads to monitor Fast Start, Post Break Ramp Up, and Strong Finish compliance — identifying where associates are losing productive time at the start of shift, after breaks, and before shift end — without requiring raw data access or bespoke reporting requests.

The dashboard answers three core business questions:

- Where are associates failing to reach productivity within the 15-minute threshold at shift start, post break, and shift end — and which sites and countries drive the highest non-compliance?
- What is the financial cost of non-compliant shift behaviour, and which metric — Fast Start, Post Break, or Strong Finish — contributes the highest wasted labour spend?
- How has compliance trended over time, and which sites have shown the most improvement following operational interventions?

Business & Technical Owners

Business Owner : XYZ, EU Process Excellence
Technical Owner : Hrishikesh Choudhari, EU D&A
Escalation Contact : Analytics Intake, EU D&A, analytics@amazon.co.uk

Refresh Schedule & Access Permissions

Refresh Frequency : Daily
Refresh Time: 09:00 AM BST
Data Lag: D-1 (yesterday's data available each morning)
Access Permissions: L3+ EU Operations Audience

⚠ This dashboard does contain employee-level personally identifiable information (PII) therefore, we have implemented Row Level Security (RLS) in Power BI before publishing, in line with Amazon's data privacy standards.
